

PART – A QUESTIONS

1. Define software testing
2. Differentiate Errors, faults and failures
3. Describe reliability in Software testing
4. Explain Test Strategy.
5. Discuss the high-level expectations in Test Planning.
6. Describe the importance of Test Scheduling in software testing..
7. Show the Bug Reporting in an ATM application..
8. How do testing metrics help a project manager?
9. Differentiate between verification and validation.
10. List out different types of software testing
11. Outline the principle of "Exhaustive Testing".
12. Relate the "Pesticide Paradox" mean in software testing?
13. Summarize Errors, Faults and Failures
14. What are high-level expectations in the context of test planning, and why are they important?
15. Explain the multifaceted goal of test planning, and how does it contribute to the overall success of a software testing project?
16. Discuss about the importance of well-defined tester assignments in software testing.
17. Explain the critical components that should be included in a well-structured bug report, and how does a detailed bug report benefit the software development process?
18. State the role of trend analysis using historical testing metrics.

PART – B QUESTIONS

UNIT 1

1. Describe the key phases in the Software Testing Life Cycle (STLC) and their importance in ensuring a robust testing process.
2. Explain the V-Model of Software Testing and its role in promoting early defect detection
3. Illustrate the differences between Black Box , Gray Box and White Box Testing

4. Explain about Software Testing Life Cycle (STLC)
5. Discuss about Software Testing Principles.
6. Describe about Program Inspections.

UNIT 2

1. Discuss the importance of Test Strategy, Resource Requirements, and Tester Assignments in Software Testing.
2. Explain the goal of Test Planning and discuss the major components of a Test Plan.
3. Determine the steps for creating a Test Plan. And develop a Test Plan for E-Commerce web and Mobile Application
4. Model a Test case design process for the ATM system
